Fluid Mechanics (FM) publishes papers on fluid mechanics. It is a forum for the publication of high-quality peer-reviewed papers. The journal presents original papers, reviews and letters. The primary goal of this journal is to advance the understanding of fluid model, its application of the principles of physical science by presenting the work in a biophysical context.

Engineering Mechanics I Lecture Notes. This note provides an introduction to the mechanics of materials and structures. You will be introduced to and become familiar with all relevant physical properties and fundamental laws governing the behavior of materials and structures and you will learn how to solve a variety of problems of interest to civil and environmental engineers.

Mechanics (Greek μηχανική) is that area of science concerned with the behaviour of physical bodies when subjected to forces or displacements, and the subsequent effects of the bodies on their environment. The scientific discipline has its origins in Ancient Greece with the writings of Aristotle and Archimedes (see History of classical mechanics and Timeline of classical mechanics).

In fluid dynamics, a stall is a reduction in the lift coefficient generated by a foil as angle of attack increases. This occurs when the critical angle of attack of the foil is exceeded. The critical angle of attack is typically about 15 degrees, but it may vary significantly depending on the fluid, foil, and Reynolds number.. Stalls in fixed-wing flight are often experienced as a sudden ...

American Journal of Mechanics and Applications (AJMA) provides a forum for sharing timely and up-to-date publication of scientific research and review articles. The journal publishes original full-length research papers in all areas related to mechanics and its applications from contributors throughout the world. It also encourages contributions from the newly emerging areas such as micro ...

We begin our analysis with the simplest case of a purely elastic fluid, $\lambda_2 = 0$, and with no-slip at the substrate, $b = 0$. Figs. 2(b)-(d) show the evolution of four distinct films with different values of the relaxation time, $\lambda_1 = 0$ (blue circles), 2 (cyan triangles), 4 (green squares), and 6 (red crosses), at three selected times. The interfacial dynamics can be divided into three phases.

IFPS. About us

Mechanics, science concerned with the motion of bodies under the action of forces, including the special case in which a body remains at rest. Of first concern in the problem of motion are the forces that bodies exert on one another. This leads to the study of such topics as gravitation, electricity, and magnetism, according to the nature of the forces involved.
