For those who wanted to hear my interview on Doctor Radio and weren't able to listen on Wednesday, here is a link to a downloadable audio file of the one hour show. Thanks to my brother, Mark, for doing this. That show leads directly into today's discussion. I always get some heat about posting essays about the stupid things people say to those with cancer.

What to say to someone with cancer/thoughts on how to be a ...

Cancer is a group of diseases involving abnormal cell growth with the potential to invade or spread to other parts of the body. These contrast with benign tumors, which do not spread. Possible signs and symptoms include a lump, abnormal bleeding, prolonged cough, unexplained weight loss and a

change in bowel movements. While these symptoms may indicate cancer, they can also have other causes.
