### **Colorectal Cancer Screening Tests - American Cancer Society**

Colorectal cancer (CRC), also known as bowel cancer and colon cancer, is the development of cancer from the colon or rectum (parts of the large intestine). A cancer is the abnormal growth of cells that have the ability to invade or spread to other parts of the body. Signs and symptoms may include blood in the stool, a change in bowel movements, weight loss, and feeling tired all the time.

### **Colorectal cancer - Wikipedia**

A screening test is used to look for a disease when a person doesn't have symptoms. (When a person has symptoms, diagnostic tests are used to find out the cause of the symptoms.) Colorectal cancer almost always develops from precancerous polyps (abnormal growths) in the colon or rectum. Screening tests can find precancerous polyps, so that they can be removed before they turn into cancer.

### **What Should I Know About Screening for Colorectal Cancer ...**

INTRODUCTION. Colorectal cancer (CRC) is one of the most common cancers worldwide and the fourth most common cause of death due to cancer, with an estimated 700,000 deaths annually []. In the United States, CRC accounts for 8 to 9 percent of cancer deaths []. Approximately one in three people diagnosed with CRC dies of this disease within five years after diagnosis.

### **UpToDate**
