What It Is. There are several possible causes of deafness in dogs and specifically in cavalier King Charles spaniels. We list two documented hereditary causes here -- congenital deafness and primary secretory otitis media (PSOM) -- as well as one other possible hereditary cause -- progressive hearing loss -- and a couple of non-hereditary ones -- anesthesia and noise-induced hearing loss (NIHL).

Deafness and the Cavalier King Charles Spaniel

Basic Neurology is a weekend course that aims to ready basic physician candidates for the RACP written exam. The course breaks down complex topics into easy to understand schemas and finally makes neurology understandable.

A joint or articulation (or articular surface) is the connection made between bones in the body which link the skeletal system into a functional whole. They are constructed to allow for different degrees and types of movement. Some joints, such as the knee, elbow, and shoulder, are self-lubricating, almost frictionless, and are able to withstand compression and maintain heavy loads while still ...

Voxels and Attenuation Coefficient. Attenuation coefficient: The tissue contained within each pixel absorbs a certain proportion of the x-rays that pass through it (e.g. bone absorbs a lot, air almost none). This ability to block x-rays as they pass through a substance is known as "attenuation". For a given body tissue, the amount of attenuation is relatively constant, and is known as ...

Dense connective tissue. Connective tissue is mainly a supporting tissue that binds and supports organs and the body as a whole. It is comprised of cells and extracellular matrix, including fibers and ground substance. Dense connective tissue, is one of the types of connective tissue also referred to as dense fibrous tissue due to relative abundance of the collagen fibers.

These bottles are generally used for haematology tests where whole blood is required for analysis. ADDITIVE: contains EDTA (ethylenediaminetetraacetic acid), which acts as a potent anticoagulant by binding to calcium in the blood. EDTA also binds metal ions in the blood and is used in chelation therapy to treat iron, lead or mercury poisoning.

Blood Bottles Guide | Geeky Medics

An intelligence quotient, or IQ, is a score derived from one of several different standardized tests designed to assess intelligence. The term "IQ," from the German Intelligenz-Quotient, was devised by the German psychologist William Stern in 1912 as a proposed method of scoring children's intelligence tests such as those developed by Alfred Binet and Théodore Simon in the early 20th Century.
