

## *Imagining The Global*

### **Imagining The Global**

The construction industry is ripe for disruption. Large projects across asset classes typically take 20 percent longer to finish than scheduled and are up to 80 percent over budget (Exhibit 1). Construction productivity has actually declined in some markets since the 1990s (Exhibit 2); financial ...

Imagination is the ability to produce and simulate novel objects, peoples and ideas in the mind without any immediate input of the senses. It is also described as the forming of experiences in the mind, which can be recreations of past experiences such as vivid memories with imagined changes or that they are completely invented. Imagination helps make knowledge applicable in solving problems ...

Imagining the Internet's Quick Look at the Early History of the Internet. President Dwight D. Eisenhower initiated the Advanced Research Projects Agency (ARPA) after the Soviet launch of Sputnik I in 1957. Eisenhower believed in the great value of science, and formed ARPA in 1958 in a quest for "the scientific improvement" of U.S. defense.
