incidents | Breaking Travel News & Incidents | news.com.au ...

A 2007 study by Popular Mechanics found passengers sitting at the back of a plane are 40% more likely to survive a crash than those sitting in the front. Although this article quotes Boeing, the FAA and a website on aircraft safety, all claim there is no "safest" seat. The article studied 20 crashes, not taking into account the developments in safety after those accidents.
