A carbon tax is a tax levied on the carbon content of fuels. It is a form of carbon pricing. Carbon is present in every hydrocarbon fuel (coal, petroleum, and natural gas) and converted to carbon dioxide (CO<sub>2</sub>) and other products when combusted. In contrast, non-combustion energy sources—wind, solar, geothermal, hydropower, and nuclear—do not convert hydrocarbons to CO

Those aren't my words — it's the title of a 2005 article, brought to my attention by Cal Beisner, which uses probability theory to "prove" that "...most claimed research findings are false". While the article comes from the medical research field, it is sufficiently general that some of what it discusses can be applied to global warming research as well.

Having looked at some of the ways in which corruption damages the social and institutional fabric of a country, we now turn to reform options open to governments to reduce corruption and mitigate its effects. Rose-Ackerman (1998) recommends a two-pronged strategy aimed at increasing the benefits of being honest and the costs of being corrupt, a sensible combination of reward

—The executive nature of public administration enables the public will to be translated into action by the people responsible for running the public bureaucracy. Occupational —Public administration includes many occupational fields—medicine, engineering, social welfare, economics, etc.

### **CHAPTER ONE: DEFINING PUBLIC ADMINISTRATION**

Paranoid managers are suspicious, touchy, humorless, quick to take offense and slow to forgive, self-righteous, argumentative, often litigious. Paradoxically the same set of traits have Authoritarian managers, so you need to distibush between two. One key difference is consistent tendency to interpret the actions of other people as deliberately threatening or demeaning and continual mistrust.
