Mirroring (psychology) The ability to mimic another person's actions allows the infant to establish a sense of empathy and thus begin to understand another person's emotions. The infant continues to establish connections with other individual's emotions and subsequently mirror their movements.

Mirroring (psychology) - Wikipedia

MIRRORING PEOPLE: About 20 years ago, a group of brain scientists unexpectedly discovered some weird brain cells. These weird cells are motor cells, that is, they send signals to our muscles to

control our actions, as when we grasp a cup of coffee or we smile. The same cells, though, and this is the surprising part,...
