Modelling Railway Stations A Practical

Railway modelling (UK, Australia and Ireland) or model railroading (US and Canada) is a hobby in which rail transport systems are modelled at a reduced scale.. The scale models include locomotives, rolling stock, streetcars, tracks, signalling and landscapes including: countryside, roads, bridges, buildings, vehicles, urban landscape, model figures, lights, and features such as rivers, hills ...

The railway system in Great Britain is the oldest in the world. The first locomotive-hauled public railway opened in 1825, which was followed by an era of rapid expansion. Whilst the network suffered gradual attrition from about 1900 onwards, and more severe rationalisation in the 1950s and 1960s, the network has again been growing since the 1980s.

The primary source of information about books on railway history is George Ottley's monumental bibliography, with its two supplements (no serious public library can claim to be that if Ottley is not available). Jack Simmons' overall evaluative surveys of the literature (both in his own books and in the Oxford Companion - Ottley is mainly non-evaluative) are also useful, but Simmons was less ...

Everything is relative. What might be a 'very popular' tourist destination in the context of the Borders (I lived there for a while and never saw much evidence of what I'd consider 'very' popularity) doesn't necessarily mean the numbers are remotely similar to those of a 'very popular' tourist destination in the Cotswolds, for example.
