Non Gmo Diet

GM corn and Roundup herbicide cause tumors and organ damage. Rats fed Monsanto's GM corn NK603 and tiny amounts of Roundup herbicide over a two-year period—the longest ever feeding study involving a GM food—developed severe liver and kidney damage, disturbance to pituitary gland function, and hormonal disruption.

The 9 most experimental and dangerous toxins in food and medicine today - are these flooding and infecting your organs, blood and brain?

GMO News | GMO News and Information

Due to massive government subsidies given to farmers to grow genetically engineered crops in the past, U.S. food manufacturers and farmers are now being caught blindsided by the sweeping demand for non-gmo and organic crops. In a twist of irony, this is driving a massive increase of organic crop imports from nations that are largely free of bioengineering.

A genetically modified organism (GMO) is any organism whose genetic material has been altered using genetic engineering techniques. The exact definition of a genetically modified organism and what constitutes genetic engineering varies, with the most common being an organism altered in a way that "does not occur naturally by mating and/or natural recombination".

Marys Free Range Chickens are from the Pitman family farm. Pitman family has been raising poultry for the last 60 years and has been passed through three family generations. We focus on trying to bring the healthiest bird possible to your table by not giving these animals antibiotics and growth hormones in their feed. We also give these animals more space to roam outside.
