

Nuclear Chemistry Careers

Nuclear Chemistry Careers

Nuclear chemistry is the subfield of chemistry dealing with radioactivity, nuclear processes, such as nuclear transmutation, and nuclear properties.. It is the chemistry of radioactive elements such as the actinides, radium and radon together with the chemistry associated with equipment (such as nuclear reactors) which are designed to perform nuclear processes.

Nuclear chemistry - Wikipedia

If you have a keen interest in the health sciences and computer technology and are looking for a people-oriented career, consider Nuclear Medicine Technology!

Technologist - Careers in Nuclear Medicine - SNMMI

Dr. Alvin M. Weinberg, the longest serving director of ORNL (1955-1972), a passionate advocate for nuclear energy whose interest in science policy placed him at the intersection of science and technology with society. Weinberg Fellows generally align with the applied, experimental, and computational sciences and demonstrate competency in areas such as chemistry and chemical engineering ...

Want to know more about careers in life science? Browse through detailed information on dozens of careers to discover what scientists, engineers, and other STEM professionals really do and what it takes to prepare for these careers.

Careers in Science - Science Buddies

adj. 1846, "of or like the nucleus of a cell," from nucleus + -ar, probably by influence of French nucléaire. Use in atomic physics is from 1914; of weapons, from 1945. Hence nuclear physics (1933), nuclear energy (1941), nuclear war (1954). Nuclear winter coined by Richard Turco, but first attested in article by Carl Sagan in "Parade" magazine, Oct. 30, 1983.
