NPK fertilizers are three-component fertilizers providing nitrogen, phosphorus, and potassium. NPK rating is a rating system describing the amount of nitrogen, phosphorus, and potassium in a fertilizer. NPK ratings consist of three numbers separated by dashes (e.g., 10-10-10 or 16-4-8) describing the chemical content of fertilizers.

Fertilizer - Wikipedia

Slow Release Granular Fertilizer / Compound Fertilizers The base range of granular fertilizers cover most crop requirements and provides high plant food power and greater nutrient value.

Neufarm

The first chemical revolution in agriculture started over 100 years ago, when soil fertilization was discovered; the second chemical revolution - the idea of foliar feeding as an effective and important tool in crop fertility - is going to be common only in our generation.

How to Choose a Fertilizer. In most cases, an all-purpose, 5-5-5 fertilizer will provide the nutrients all plants need for healthy growth. If a soil test reveals certain nutrient deficiencies, or if you want to tailor your fertilizer to the needs of particular plants (tomatoes vs. flowers), you can select a special formulation.
