The discovery that aging can be ameliorated by dietary, genetic, and pharmacological interventions has opened up the prospect of a broad-spectrum, preventive medicine for aging-related diseases (Fontana et al., 2014, Goldman et al., 2013, Partridge, 2010). Single-gene mutations that extend animal lifespan can ameliorate natural, age-dependent loss of function (Metaxakis et al., 2014, Stein and ...

Eat more plant protein. A study from Harvard found that people who ate a diet high in processed meats like sausage and hot dogs, were at a higher risk of death—but those who got their protein from plants had a lower risk, especially of heart disease-related deaths. "The study said that for every three percent increase in calories from plant protein there was a reduction in risk of death by ...

### **50 Science-Backed Ways to Increase Your Longevity**

Science Diet is a relatively popular brand that is high on the cost spectrum but unfortunately low on the nutritional spectrum. Although it is touted as a premium diet, it contains nearly all the same ingredients as low-quality foods and no more nutrition. This problem is especially prominent with the dry formula. The main protein ingredient is a meat or poultry by-product, which can consist ...
